

Attention Vasectomy Patients

- The **self-pay** cost for a vasectomy for patients with no insurance is **\$800**.
- If you have **ACTIVE** health insurance coverage, we will still require payment from you at the time you schedule your procedure, but we will only collect the **allowable** amount that your insurance company would pay, per our contract with them. We will bill your insurance company for the procedure and if they pay, we will refund your payment immediately (minus any copay, coinsurance and/or deductible that may be applied).
- There are many different health insurance plans, and within those plans, the benefits vary. Not all plans cover vasectomy and even if they do, there may be a deductible or other charges that has not been met.
- If you have private health insurance, call your insurance company (the phone number should be on the back of your card). Make sure you write down the name of the person you speak to and ask for a call reference number. Here are the important questions:
 - Is **vasectomy covered** under my plan?
 - **Procedure code is: 55250**
 - **Diagnosis code is: Z30.2**
 - **Our NPI#: 1497700363**
 - **Our Tax ID#: 23-2101721**
 - **Procedure is an In-Office Procedure (location code: 11)**
 - **Do I have a deductible; if so, how much is left for this year?**
 - **Do I have a copay or coinsurance with this procedure?**
 - **Is Dr. Sloane an in-network provider; if not, does my plan have out-of-network coverage?**
 - **Dr. Sloane's NPI#: 1518954536**
 - **Do I need a referral for this procedure?**
- Below is a list of the allowable amounts for various insurance companies. If one of your plans is on this list, the amount listed is the amount you will pay when you schedule your vasectomy (Please note, your insurance plan must be **ACTIVE** at the time of your procedure; if not, you will be considered a self-pay patient and be required to pay \$800).

○ Aetna: \$303.11	○ Keystone POS: \$465.80
○ Ambetter: \$346.32	○ Medicare (Not Covered): \$800.00
